

FCT ERASMUS+ 2021-2022
KA1 - Movilidad de las personas por motivos de aprendizaje
Movilidad de Educación Superior entre países del programa

Every year, our students who study for Higher Vocational Training Degrees, have the opportunity to participate in a Vocational Training Module. This training module is offered by different companies within the framework of the European Erasmus+ project.

Pablo Gutiérrez Martín and Rodrigo Segundino Barquín, two of our Automotive Technology students, will go to Berlin this year for their internships and our Multiplatform Application Development student Jorge García León is lucky to do his internship in Paderborn/Germany.

Pablo Gutiérrez

Rodrigo Segundino

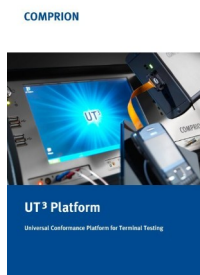

Jorge García

The students will carry out their internships in the months of March and May 2022 in the following companies:

In the specialty of Multi-platform Applications Development we began our collaboration:

- COMPRION GmbH (<https://www.comprion.com/>), specialized in the development of system tools for diagnostic testing in the telecommunication sector and offering analysis and consultancy services.

In the automotive speciality we repeated the experience with the companies:

- Dinnabier Premium Cars (<http://www.dinnebier-kudamm.de/de/portal>), official service of Maseratti, Jaguar and Land Rover.

- Autohaus Dinnebier GmbH Kurfürstendamm (<https://dinnebiergruppe.de>), official service of Kia and Ford.

The collaboration with these companies is indispensable for our Erasmus+ student internship programmes, as they provide excellent apprenticeship experiences. Personal intercultural contact and professional experience abroad lead our students to become interconnected European citizens which is a fundamental objective of the European Union.
